## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1-4, 15 and 18-20, drawn to the polypeptide of SEQ ID NO:1 and a kit thereof.

Group II, Claims 5-11, 21-27 and 34-35, drawn to a polynucleotide encoding SEQ ID NO:1, a plasmid or vector comprising the nucleotide encoding SEQ ID NO:1, a cell containing the vector, a method of making the protein of SEQ ID NO:1 and a kit comprising the nucleotide encoding SEQ ID NO:1

Group III, Claims 13, 28-29 and 36-37, drawn to an antibody capable of binding to the polypeptide of SEQ ID NO:1 and Amb a 1.1, Amb a 1.2, Amb a 1.3 and Amb a 2 and a kit thereof.

Group IV, Claims 14, 28-29 and 36-37, drawn to an antibody capable of binding to the polypeptide of SEQ ID NO:1 but not Amb a 1.1, Amb a 1.2, Amb a 1.3 and Amb a 2 and a kit thereof.

Group V, Claims 16-17, drawn to a method of treating preventing or diagnosing an allergic disorder by administering a medicament comprising the polypeptide of SEQ ID NO:1.

Group VI, Claims 30-31, drawn to a method of treating preventing or diagnosing an allergic disorder by administering a polynucleotide encoding the polypeptide of SEQ ID NO:1.

Art Unit: 1644

Group VII, Claims 33, drawn to a method of treating, preventing or diagnosing an allergic disorder comprising administering an antibody capable of binding to the polypeptide of SEQ ID NO:1 and Amb a 1.1, Amb a 1.2, Amb a 1.3 and Amb a 2.

Group VIII, Claims 33, drawn to a method of treating, preventing or diagnosing an allergic disorder comprising administering an antibody capable of binding to the polypeptide of SEQ ID NO:1, but not Amb a 1.1, Amb a 1.2, Amb a 1.3 and Amb a 2.

Claim 12 links inventions III and IV and claim 32 links inventions VII and VIII.

The restriction requirement among the linked inventions is subject to the nonallowance of the linking claims, claims 12 and 32. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 1644

4. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I was found to have no special technical feature that defined the contribution over the prior art of WO96/13589 (PTO-892, Reference N)

WO 96/13589 teaches a polypeptide consisting of 11 contiguous amino acids of the amino acid sequence as shown in SEQ ID NO:1 of the instant application (In particular, SEQ ID NO:67 on page 92; Claim 19 and attached sequence alignment).

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 1644

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nora M. Rooney whose telephone number is (571) 272-9937. The examiner can normally be reached Monday through Friday from 8:30 am to 5:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.
